**Subject:** RE: \*\*\*SPAM\*\*\* Registration from an Email (iCagenda - English)  
**Attachments:** Your registration to event 'Semi Final Club Championship' on Belrose Bowling Social Golf Club

Hi Cyril,

My apologies – I sent a response some time ago while in transit but the page timed out when I pressed send!

Ok – What I was looking for if possible is:

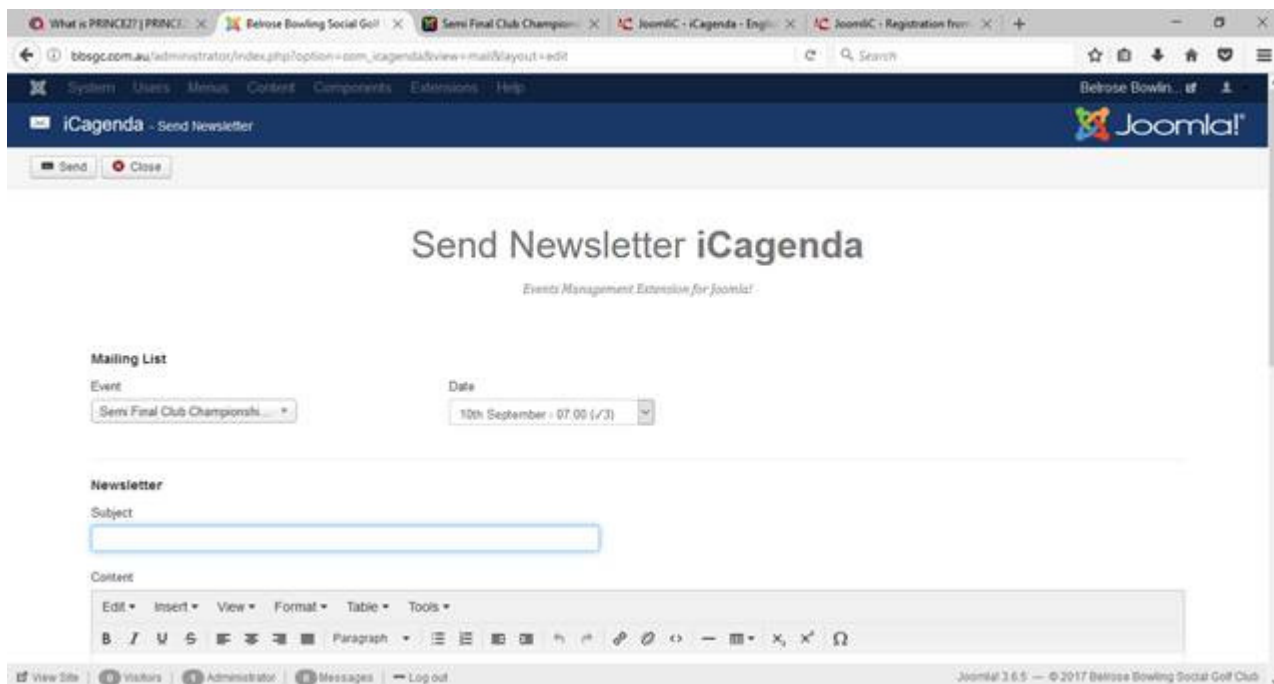

I have added a group of users into a Joomla Contact Category called BBSGC Members

The screenshot shows the Joomla! administrator interface for editing a contact. The browser address bar shows the URL: [bbsgc.com.au/administrator/index.php?option=com\\_contact&view=contact&layout=edit](http://bbsgc.com.au/administrator/index.php?option=com_contact&view=contact&layout=edit). The page title is "Joom!C - iCagenda - English - Joom!C FORUM". The contact being edited is "Rob Langer". The form includes the following fields:

- Linked User:** Rob Langer
- Image:** images/Membe (Select)
- Position:** Member
- Email:** robert@robcey.com.au
- Address:** 8/6 Stanfield Ave
- City or Suburb:** St Ives
- State or Province:** NSW
- Postal/ZIP Code:** 2075
- Country:** Australia
- Telephone:** 94401025
- Mobile:** 0421044922
- Fax:**
- Website:**
- First Sort Field:**
- Second Sort Field:**
- Third Sort Field:**
- Status:** Published
- Category \*:** BBSGC Members
- Featured:** No
- Access:** Registered
- Language:** All
- Tags:** Type or select some options
- Version Note:**

The footer of the page shows "Joomla! 3.6.5 - © 2017 Belrose Bowling Social Golf Club".

I would like to send a templated iCagenda Newsletter (similar to the “Custom Email if registered to a single date” template) with a link to selected Event with a unique token id for each registered user in the category. The link would be a seamless (ie does not have to login) acceptance and registration to the event.

## Template

Hello [NAME],

The event '[TITLE]' is now open for registration.

Please click on the following link [REGEVENTURL] to register for the event.

If you want to see again the details of this event, please click on the following link or, if it's not clickable, copy and paste it to your browser. [EVENTURL]

Best regards,

[SITENAME]

### The Email the Contact receives

Hello Rob Langer,

The event "Semi Final Club Championship" is now open for registration.

Please click on the following link <http://bbsgc.com.au/index.php/calendar/51-semi-final-club-championship?date=2017-09-10-07-00/rob-langer/register/<TOKENID>> to register for the event.

If you want to see again the details of this event, please click on the following link or, if it's not clickable, copy and paste it to your browser. <http://bbsgc.com.au/index.php/calendar/51-semi-final-club-championship?date=2017-09-10-07-00>

Best regards,

Belrose Bowling Social Golf Club

When the contact selects the link with the TOKENID it would add them as a registered user for the event, be visible as a Participant in the event, and send them a confirmation email (as it does now – example attached).

The validations would be:

The token is unique to each registered contact with a time bomb expiry to the event date

Is the event valid  
Is the event open  
Is the contact valid  
Is the contact registered  
Is the token valid  
Has the token expired

If any of the validations fail, a message saying the registration failed with the reason with an option/link back to the event.

When the cancellation is available, I would like to have that as a link in the template with the same options to cancel the event ie [CANCELEVENTURL]

<http://bbsgc.com.au/index.php/calendar/51-semi-final-club-championship?date=2017-09-10-07-00/roblanger/register/<TOKENID>>

While on the wish list, could any widget containing the events please be in event date order? Especially in the administration back end.

Regards  
Rob

A new reply has been posted on the Joomla!C FORUM

Message Subject : Registration from an Email

Category : iCagenda - English

Posted by : Lyr!C

URL : <https://www.joomla.com/forum/icagenda-help-en/3581-registration-from-an-email#14833>

Message:

Hello Rob, as i'm currently working on registration improvement and additional features for registration system (3.7.x serie), could you detail more what you would like to accomplish (concrete example maybe ?) ?

Eg. what do you mean by "group" and about "accept" ? (confirmation, or already created registration by you for one user, needing a user confirmation?)

Thank you!

Best regards,  
Cyril
